

**Asilomar-Chameleon mapping for National Statistics: Fort Wayne, Indiana**

See departmental matrix for explanations and examples of each area.

Asilomar categories:

- H Healthy
- TR Treatable Rehabilitatable
- TM Treatable Manageable
- UU Unhealthy untreatable

**Based on euthanasia subtypes:**

| <u>Euthanasia Reason</u>   | <u>Asilomar category</u> |
|----------------------------|--------------------------|
| Medical                    |                          |
| Emergency                  | UU                       |
| Severe                     | UU                       |
| Moderate                   | TM                       |
| Mild                       | TR                       |
| Behavior                   |                          |
| Aggression                 | UU                       |
| Fear                       | TM                       |
| Anxiety                    | TM                       |
| High Arousal               | UU                       |
| Housebreaking              | TM                       |
| Feral < 12 wks             | TR                       |
| Feral > 12 wks             | UU                       |
| Unweaned < or = to 4 weeks | UU                       |
| Unweaned over 4 weeks      | TR                       |
| Pregnant                   | TR                       |
| Hybrid/ Exotic             | UU                       |
| Space                      | H                        |

**Full Matrix evaluation for compression to euthanasia reasons:**

The following reasons for euthanasia were compressed to the above subtypes

| H Healthy | TR Treatable Rehabilitatable  | TM Treatable Manageable   | UU Unhealthy & Untreatable   |
