W	<b>ENDING SHELTER COUNT (12.31.2008)</b>	1083	553	1636

In a perfect world, the Ending Count is equal to the Beginning Count (A) plus Total Intake

(F) minus all Outcomes (R+V). -----> 11083 553 11636

If your reported Ending Count does not match these numbers, please go back through your data and be sure you didn't miss something (i.e., animals in foster, adoptions, transfers, etc.). If all animals have been accounted for and the reported Ending Count is different, please indicate in the comment section.

**COMMENTS: Lines G and R do not match because five animals correctly classified at animal control intake as unhealthy/untreatable owner-requested euthanasia were released during the year to an adoption guarantee organization able to treat/rehabilitate the animal instead of being euthanized.**

I agree that in completing this form, we have used the Maddie's Fund definitions of "Healthy," "Treatable - Manageable," "Treatable - Rehabilitatable," and "Unhealthy & Untreatable" as set forth in the attached document titled, "Maddie's Fund<sup>®</sup> Categorizations/Definitions of Shelter Animals."
